About SHINING

SHINING Aluminum Packaging Co., Ltd, is one of the leading Chinese manufacturer of aluminum containers, including aluminum jar, aluminum tube, and other unique aluminum packaging options for global consumers of wine, vodka, beer, energy shot, olive oil, soft drink, coffee and health drink.

We apply non-toxic epoxy resin inner coating on our bottles to keep your content safe and fresh. Our bottles have passed all rigorous third-party tests which were conducted in accordance with both LFGB and FDA standards. Our facilities are equipped with high-end production equipment from Mall+Herlan, and Hinterkopf. Uncompromised quality is our principle.

WATER

SOFT DRINKS

JUICE

SLEEP DRINKS

BEER

WINE

SPIRITS

FOOD OIL

CAPSULE

ADVANTAGE

Lightweight

Aluminum packaging conserve resources during the transport and storage of the product and the packaging itself, both to the consumer and at the end of its product life.

Recyclable

The recycling of aluminum in packaging applications uses fewer resources than what is needed in raw aluminium production. Consequently, aluminum beverage cans bottles are the most recycled container in the world.

Formable

The formability of aluminum allows for the manufacture of custom bottle shape. The metal's malleability also means that aluminum packaging can keep its integrity even if it is deformed by external impact.

Protective

Aluminum is the lightest material available on consumer packaging that offer a complete barrier against light, gases and moisture - which helps to extend the life of your content.

Conductive

Aluminum has a top-of-range thermal conductivity out of many material, making it ideal for applications that require minimal heating and chilling times and energies, such as cold beverages sold in retail stores.

Decorative

Aluminum's diverse range of finishes plus its compatibility with all printing technologies provides designers with enormous flexibility to create packaging with stunning graphic design, maximizing shelf presence and brand identity.
